

**Department of Computer Technology****Vision of the Department**

To be a well-known centre for pursuing computer education through innovative pedagogy, value-based education and industry collaboration.

Mission of the Department

To establish learning ambience for ushering in computer engineering professionals in core and multidisciplinary area by developing Problem-solving skills through emerging technologies.

Rubrics for Evaluation of Project Phase-1

A rubric is an authentic assessment tool that:

- Provides clear expectations for a project.
- Examines the product (project) as well as the entire project-development process.
- Enumerates the performances (parameters) on which students will be evaluated.
- Explains what constitutes excellence during the project process.
- Helps students understand what they need to do to excel.
- Helps remove subjectivity and bias from the evaluation process.

Criteria for project Evaluation in 6th Semester

S. N.	Evaluation Parameter	Max. Marks
1.	PQAI 1	10
2.	Project Progress Seminar-I	20
3.	Assessment By Project Guide Max. Marks = 30	
	a) Project report, internal viva voce	15
	b) Regularity, Attendance, Interaction with Guide	10
	c) Project Diary, Synopsis, Paper Writing, Poster Presentations	05
Total		Max. 60

Following rubrics can be used for assessment of Project Phase-1

1. Criteria: PQAI-1 (10 M)**Sample Assessment Sheet for PQAI-1**

Roll No.	Name of the Student	Clarity Regarding Topic/Subject (04)	Literature Review (03)	Presentation and Communication (03)

Rubrics for PQAI-1

**Department of Computer Technology****Vision of the Department**

To be a well-known centre for pursuing computer education through innovative pedagogy, value-based education and industry collaboration.

Mission of the Department

To establish learning ambience for ushering in computer engineering professionals in core and multidisciplinary area by developing Problem-solving skills through emerging technologies.

Clarity Regarding Topic/Subject (04)

S.N.	Parameters	Excellent (4)	Good (2-3)	Average (1)
1.	Title, aim and objectives/ problem definition	- Formulation of problem definition with a well-defined scope - Use of latest technology - Innovative work with research value	- Formulation of problem definition with not well-defined scope - Use of Contemporary technologies - Minor innovative work	- Basic formulation of problem definition - Use of obsolete technology - No innovative work

Literature Review (03)

S.N.	Parameters	Excellent (3)	Good (2)	Average (1)
2.	Literature Review	- Satisfying/Good literature and complete references - Recent and relevant literature referred and cited - Identification of clear research gap in line with problem definition	- Limited/Moderate literature and insufficient references - Old and irrelevant literature referred and improperly cited - Moderately identified research gap not much in line with problem definition	- Insufficient literature referred - Non-recent and irrelevant literature referred with poor citation - Vague research gap identified.

Presentation and Communication (03)

S.N.	Parameters	Excellent (3)	Good (2)	Average (1)
3.	Presentation and Communication	- Excellently prepared presentation considering all guidelines and time management - Excellent presentation skill - Good answering to Q-A session	- Well prepared presentation considering guidelines and time management - Good presentation skill - Satisfactory answering to Q-A session	- Poorly prepared presentation without considering guidelines and time management - Poor presentation skill - Vague answering to Q-A session

2. Criteria: Progress seminar I (20 marks)**Sample Assessment Sheet for Project Progress Seminar-I**

**Department of Computer Technology****Vision of the Department**

To be a well-known centre for pursuing computer education through innovative pedagogy, value-based education and industry collaboration.

Mission of the Department

To establish learning ambience for ushering in computer engineering professionals in core and multidisciplinary area by developing Problem-solving skills through emerging technologies.

Roll No.	Name of the Student	Extent of Work Done & Contribution (15)			Presentation and Communication (5)
		Design Methodology (05)	Development of theoretical and experimental methods (05)	Demonstration (05)	

Rubrics for seminar I**Design Methodology (5)**

S.N.	Parameters	Excellent (4-5)	Good (2-3)	Average (1)
4.	Design Methodology	- Good understanding of the problem definition and its division in proper modules - Appropriate design methodology and proper justification - Good understanding of the selection of coding platform/tool/technique	- Moderate understanding of problem definition - Design methodology not properly justified - Moderate understanding of the coding platform/tool/technique	- Poor understanding of the problem definition - Poor justification of the used design methodology - Poor knowledge of the coding platform/tool/technique used for implementation

Development of theoretical and experimental methods (5)

S.N.	Parameters	Excellent (4-5)	Good (2-3)	Average (1)
5.	Development of theoretical and experimental methods	- Very good understanding of the problem and relevant material. - Project implementation is Complete and with accurate description	- Good understanding of the problem, with study of relevant material. - Project Implementation is Complete, but with Inaccurate description.	- Clear understanding of the problem, with scarce knowledge of relevant material. - Project implementation is Complete, but with inaccurate description.

Demonstration (5)

S.N.	Parameters	Excellent (4-5)	Good (2-3)	Average (1)
6.	Demonstration	- Objectives achieved as per time frame. - Very good understanding of the implementation	- Objectives achieved as per time frame. - Moderate understanding of the implementation of the problem	- Objectives achieved as per time frame. - Fail to justify the queries on the implementation

Presentation and Communication (5)

**Department of Computer Technology****Vision of the Department**

To be a well-known centre for pursuing computer education through innovative pedagogy, value-based education and industry collaboration.

Mission of the Department

To establish learning ambience for ushering in computer engineering professionals in core and multidisciplinary area by developing Problem-solving skills through emerging technologies.

S.N.	Parameters	Excellent (4-5)	Good (2-3)	Average (1)
7.	Presentation and Communication	- Excellently prepared presentation considering all guidelines and time management - Excellent presentation skill - Good answering to Q-A session	- Well prepared presentation considering guidelines and time management - Good presentation skill - Satisfactory answering to Q-A session	- Poorly prepared presentation without considering guidelines and time management - Poor presentation skill - Vague answering to Q-A session

3. End semester evaluation (40)**Sample Assessment Sheet for End Semester Evaluation**

Roll No.	Name of the Student	Title, aim and objectives/ problem definition (5)	Methodology adopted (10)	Presentation and communication (10)	Viva-voce by external (15)

Rubrics for End semester evaluation**Title, aim and objectives/ problem definition (5)**

S.N.	Parameters	Excellent (4-5)	Good (3)	Average (1-2)
1.	Title, aim and objectives/ problem definition	- Formulation of problem definition with a well-defined scope - Use of latest technology - Innovative work with research value	- Formulation of problem definition with not well-defined scope - Use of Contemporary technologies - Minor innovative work	- Basic formulation of problem definition - Use of obsolete technology - No innovative work

Methodology adopted (10)

S.N.	Parameters	Excellent (8-10)	Good (5-7)	Average (1-4)
2.	Methodology adopted	- Good understanding of the problem definition and its division in proper modules - Appropriate design methodology and proper justification - Good understanding of the selection of coding	- Moderate understanding of problem definition - Design methodology not properly justified - Moderate understanding of the coding platform/tool/technique	- Poor understanding of the problem definition - Poor justification of the used design methodology - Poor knowledge of the coding platform/tool/technique

**Department of Computer Technology****Vision of the Department**

To be a well-known centre for pursuing computer education through innovative pedagogy, value-based education and industry collaboration.

Mission of the Department

To establish learning ambience for ushering in computer engineering professionals in core and multidisciplinary area by developing Problem-solving skills through emerging technologies.

		platform/tool/technique	ue	que used for implementation
--	--	-------------------------	----	-----------------------------

Presentation and Communication (10)

S.N.	Parameters	Excellent (8-10)	Good (5-7)	Average (1-4)
3.	Presentation and Communication	- Excellently prepared presentation considering all guidelines and time management - Excellent presentation skill - Good answering to Q-A session	- Well prepared presentation considering guidelines and time management - Good presentation skill - Satisfactory answering to Q-A session	- Poorly prepared presentation without considering guidelines and time management - Poor presentation skill - Vague answering to Q-A session

Viva-voce by external (15)

S.N.	Parameters	Excellent (12-15)	Good (7-11)	Average (1-6)
4.	Viva-voce	- All the questions are answered properly. - Confident in answering the questions on the tools and technologies used in the implementation	- Most of the Questions are answered properly. - Moderate level of confidence in answering the questions on the tools and technologies used in the implementation	- Very few of the Questions are answered properly. - Lack of confidence in answering the questions on the tools and technologies used in the implementation
